

About Enaretos

Enaretos is a dedicated group of people bringing years of real-world experiences and expertise together to create and develop projects to overcome business, regional, national and international challenges. We seek to create economic growth while building stronger companies.

We constantly endeavor to strengthen our country's economy and people and to extend that strength to create positive changes globally. We believe the employment and empowerment of dedicated people and the use of the right technologies at the right time can unite to accomplish great things.

Our Philosophy

Enaretos is dedicated to achieving virtuous excellence in everything we do. Each project cannot arrive at its full potential by simply laboring and striving on its own. Every project has unique characteristics which must be discovered and developed to achieve its full potential.

Real-world business knowledge and experiences allow Enaretos to bring fresh and invigorating insight to every project in which we contribute. As business leaders, the goals are to optimize resources, and create environments to make informed executive decisions to help businesses grow and profit.

Enaretos can provide projects with valuable insights and the information needed to contain costs, support key business initiatives, manage changes and succeed in accomplishing business goals. To succeed, you need to stay current on key business and technology trends that can impact the entire organization.

Enaretos service offerings focus on business and technology solutions that increase competitive advantage through added efficiency and effectiveness and make innovation and virtualization strategies real.

We must realize we cannot expect a project to arrive at its full potential by simply laboring and striving on our own. Enaretos Partners is dedicated to achieving excellence in everything we do by applying proven business methods and techniques.

It is our firm belief that only through complete empowerment can we truly have our human efforts achieve their full potential and achieve the "*arête*" the ancient Greeks so highly prized.

At Enaretos we understand how to develop your assets: human resources, intellectual property, financial positions and others, to achieve their intended capacity.

Our Core Team

Timothy J. Wright – General Partner

Tim brings veteran knowledge and experience to Enaretos stretching from entrepreneurial start-ups to Fortune 25 corporations. Tim's background includes Executive Management, Research and Business Development, Alternative Energy Development, Agricultural Business, Management, Sales, Marketing and Project Management.

Tim's experiences allow him to combine his expertise with entrepreneurial vision, partnership building and market share acceleration creating geographical expansion. Tim's proven capability to grasp and translate requirements into cost-centric solutions while identifying long-term opportunities have produced high-impact R-O-I results for companies and clients. Tim has a demonstrated proficiency to drive brand awareness to catalyze revenue generation with product development and launch, resource acquisition and utilization while steering companies to capitalize on new opportunities through innovative strategies.

Tim has developed multiple regional, national and international businesses and business development programs. As Vice President at an international food and beverage company, Tim lead product development and sale and marketing teams to expand the company to its largest historical growth and distribution.

Tim has created business development programs for retail, agricultural and industrial packaging products and systems with multifold increases in sales and brand awareness. Tim has managed worldwide business development, sales, marketing and supply chain systems for a multi-billion-dollar global corporation.

Tim has degrees from the University of Missouri in Agricultural Science and Business Management and Food Science and Nutrition.

Jeffrey P. Solscheid – General Partner

Jeff's many years of experience in the Fortune 500 world of finance and business provide Enaretos and our clients unique perspectives. Jeff's experience and skills as a Master Financier and Strategic Planner helps create the critical edge our clients need to be successful in diverse endeavors.

Jeff has comprehensive experience analyzing and streamlining accounting systems that have proven his ability to develop and execute creative solutions that insure deliverance of financial goals. His leadership in budgeting and strategic planning provides both long- and short-term solutions to the many challenges of business today.

Jeff excelled as Senior Business Planner for one of America's foremost Fortune 50 companies. He was awarded the "Business Planner of the Year" for his ability to skillfully manage all finance and accounting related operations for multiple locations in Northwestern states with multi-million-dollar revenues.

Jeff received a Bachelor of Science in Accounting from Central Washington University where he was also a starting pitcher for the CWU Wildcat baseball team.

James D. Wessels – General Partner

Jim brings over three decades of extensive and diverse business experiences to Enaretos.

Jim's background includes Business Development, Private Funding sourcing, Resource and Commodity Brokerage, Agricultural Business, Security along with High-Level Business Solutions and Government Interactions.

His experience as a Certified Homeland Security and Forensics Examiner has provided our clients important insight into corporate security and risk management in today's ever-changing world. Jim's experiences supporting and working with high level clients has allowed him to develop a large network of contacts and resources. Jim also brings a wealth of experience in the world of Corporate Security, Executive Protection, Law Enforcement and Criminal Justice.

Jim has provided organizations and business with risk assessments and assisted in the development and implementation of appropriate programs and structure to protect the organizations, assets, employees and visitors. Jim has developed and installed security systems and POS systems to reduce losses in retail organizations.

Jim has worked for several years across a broad spectrum of several industries and brings a wealth of knowledge to the team. Jim's entrepreneurial vision allows him and his team to excel in forging relationships to create partnerships, drive market share acceleration and provide geographical expansion for diverse clients.

Jim holds a Degree in Criminal Justice, is a Certified Homeland Security Member, Forensics Examiner, Protection Specialist and has State Police and Security Certifications.
